

Project Management Services and Energy Efficient Cooling Solutions

Faisal Jassim Group
We bring life to your building

About Us

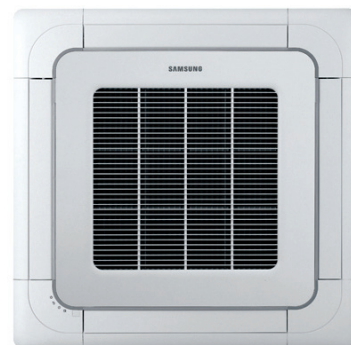

A contracting arm of Faisal Jassim Group, engaged in providing quality turnkey solutions for all your air conditioning needs.

Our Project Management Services includes:

- Design assistance
- Energy efficient and smart solutions
- Technical, product and field training
- Site installation and supervision
- Testing and commissioning services
- After sales support
- Annual maintenance contract
- Retrofitting

We are also the distributors of Samsung AC systems and Climaveneta Chillers. We provide energy efficient cooling solutions in the building services industry.

Why Choose Us

• We have a team of experienced engineers to attend to customer needs, from design stage through after sales service to the complete satisfaction of the owners and end users.

• Our products are energy efficient and eco friendly, capable of providing outstanding performance backed by innovation in design.

- Complies with sustainability requirements
- Stock availability for immediate deliveries
- Efficient spare parts management

Our Brands

SAMSUNG

Manufacturer of world-class energy efficient variable refrigerant flow systems, split system and packaged units. This is a perfectly optimized cooling and heating system for residential and large buildings requiring different air solutions.

Product and Features

VRF product range 4 HP - 96 HP

Outdoor Units:

Air Cooled VRF condensing units-DVMS

The eco-friendly Samsung air conditioning system saves money and the environment, while providing a powerful performance, capable to work up to 54 deg C without tripping. Its innovative Dual Inverter Compressor with a high efficiency vapour injection system ensures powerful rapid cooling with minimum energy consumption. Samsung condensing units use R410A refrigerant.

Indoor units:

- Ducted type
- Wall mounted and decorative type
- Cassette type

CLIMAVENETA

A European leader in HVAC and HPAC with 40 years' experience, is in business for a purpose: to provide energy efficient heating, air conditioning and data center cooling solutions that enhance everyone's comfort, improve the profitability of a building and do not contribute to an increase in CO2 levels.

Products and Features

Climaveneta air cooled chillers

- Chillers are Eurovent Certified upto 1500KW are available in both fixed speed screw compressor and variable speed screw compressor.
- We are offering 2, 3 or 4 compressor/circuit upto 1818KW and the lowest capacity is 145KW.
- The chillers are of 'W' shaped design which saves the footprint compared to the conventional 'V' shape design.
- Climaveneta chillers offer three different efficiency versions for various models in standard configurations, at both full and partial load conditions.
- At full load conditions, these chillers can operate at 46 deg C ambient with standard units and can operate upto 50 deg C ambient with add on features. At partial loads, it will operate at 57 deg C with selected models.
- Climaveneta chillers use EC motors in their fans, which guarantee better performance and reduced sound level at low ambient temperature.
- Four heat recovery options as standard for all hydronic systems.
- Widest range of solutions, highest configurations, customized solutions, eco-friendly and lowest cost of ownership.
