

HVAC and Engineering Services

FJCare Technical Services LLC is a “Total Solution Provider” launched by Faisal Jassim Group, who are specialist in the HVAC field and well versed to offer engineering services, including but not limited to annual maintenance programs, compressor rebuild, replacements, HVAC Systems installation and supply of genuine HVAC and Refrigeration spare parts.

Evolving to keep up with the changing demands of time is intrinsic to the company. A commitment to quality, process orientation, flexibility, proven methodology, ability to establish engineering teams and a good understanding of various industry standards has been the basis of our long term relationship with our reputed clients.

Vision

To be the most efficient, competent and professional engineering service provider, exceeding our customers expectation and provide them full satisfaction on time, every time.

Mission

- To provide extraordinary service that will position us ahead of our competitors.
- To have a unique combination of a highly trained workforce and superior equipment and instrumentation.
- To always perform our job professionally and never take “short cuts”.
- To maintain a close relationship with our clients, and to utilize their feedback, as one of the main pillar in building of future growth.
- Continuous improvement of business process and to adopt the latest related technologies.
- To remember that a customer’s trust must be earned, not expected.

Our Values

Each individual within our business is dedicated to work in accordance with our core values, which live at the heart of everything we do.

- Professional and quality driven employees
- Customer focused
- Innovative, dynamic and quality oriented.
- Prioritize health, safety and sustainability.

Our Engineering Services

Service Solutions

FJCare aims to provide high-end engineering services through certain standards for excellent maintenance and repair of the air conditioning system. If the air conditioning system is not optimized to achieve energy efficiency and reliability, then that cost will increase. Our service solutions include, but, are not limited to preventive and corrective maintenance, compressor rebuild and overhauling, rectification, replacement, upgrade and added value engineering services which are designed to ensure that the air conditioning system, is periodically maintained to meet the building's operational requirements while achieving high energy efficiency and system reliability, which...

- Prevents frequent breakdown
- Cuts down utility bill
- Extends equipment life

HVAC Projects

- HVAC System supply, installation and commissioning.

The FJCare HVAC project team is experienced and capable of undertaking all types of air conditioning designs & installations. FJCare is ready to deliver an optimum system to the highest industry standard. Our engineering team will provide alternative options and advice before a final proposal is made.

Our Projects Division will manage the project right from design stage, installation and through final commissioning before handing over the project to the customer. The projects erection team will supervise the project execution through all stages and at the time when commissioning takes place to ensure the system is set up correctly to the building requirements and design parameters. Our Project Team has a vast experience in various type of Installation and System application which includes:

- DX System
- VRF System
- Chilled Water System

Supply of HVAC Parts & Accessories:

To reach out to its customers as a Total Solution Provider, FJCare has ventured into opening its own trading wing which comprises of genuine HVAC and refrigeration parts and accessories, representing premium products from reputed manufacturers like York, JCI and Danfoss. Our product range fits the requirement of your project, either, in the service field or for the execution of your HVAC installation projects. We strongly believe that we can offer you a prompt and professional product supply to the standard that you would expect. We always believe that, "The best part we have is your satisfaction".

In an increasingly competitive world, leveraging the right technical expertise is the key to organizational success. We at FJCare, add better engineering value and deliver efficient technical support that gives us a competitive edge in the market. You deal with resourceful Engineers capable of handling all your technical needs and adept at being flexible to suit your requirement.
